PROFESSIONAL SUMMARY

Systems Engineer and Specialist in Software Development with more than 10 years of experience building enterprise solutions on the Microsoft ecosystem. I work with C#, ASP.NET Core, ASP.NET WebForms/WinForms, Angular, SQL Server, Oracle and PostgreSQL, across full stack development, REST APIs, internal information systems, database optimization, electronic invoicing with DIAN validation, production support and legacy system modernization. Experienced in requirements gathering, technical and functional analysis, documentation, quality assurance and source code inspection. Currently working with Docker, Azure Pipelines, Python with FastAPI and generative AI applied to software development.

TECHNICAL SKILLS

- **Languages:** C#, SQL, JavaScript, TypeScript, Python, Java, Visual Basic .NET, PHP.
- **Backend:** ASP.NET Core, ASP.NET WebForms, WinForms, Web API, REST APIs, Entity Framework Core, layered architecture, JWT with refresh tokens, BCrypt, rate limiting.
- **Frontend:** Angular, TypeScript, HTML5, CSS3, Angular Material, React Native (developing).
- **Databases:** SQL Server, Oracle, PostgreSQL, MySQL, T-SQL, PL/SQL, data modeling, query optimization.
- **Cloud & DevOps:** Docker (multi-stage, Compose, Nginx as proxy), Azure Pipelines, Azure App Service, AWS Cloud9, AWS S3, CI/CD, GitHub Actions, Git, GitHub, Bitbucket.
- **Quality & Testing:** xUnit, MSTest, Pytest, SonarQube, Postman, Swagger/OpenAPI, source code inspection.
- **Methodologies:** Scrum (SFPC), Jira, Trello, Azure Boards, ITIL Foundations, support to CMMI DEV 3, requirements engineering, NTC ISO 9001 internal quality audit.

PROFESSIONAL EXPERIENCE

Software Developer — Independent / Freelance

Pereira, Colombia | April 2023 – Present

- Development of solutions for process automation, system modernization and improvement of operational workflows.
- Built a data processing solution with Python, Pandas and Boto3 for ingestion, validation and cleaning of CSV files.
- Built a REST API in .NET 10 with layered architecture, JWT with refresh tokens and integration tests, containerized with Docker and continuous integration on Azure Pipelines with image publishing to Docker Hub.
- Consulting on the transition of legacy systems toward modern architectures with .NET Core and Angular.
- Proof of concept with local language models applied to the automation of technical documentation.

Technologies: ASP.NET Core, C#, Angular, SQL Server, Docker, Azure Pipelines, Python, Pandas, Boto3, FastAPI, AWS

Operations Programmer Analyst

NASE Colombia S.A.S. | July 2025 – January 2026

- Development of automation solutions with Google Apps Script to optimize operational processes and workflows.
- Scripting integrated with Google Workspace (Sheets, Forms, Drive) for report automation and data consolidation.
- Technical support and maintenance of internal applications, ensuring operational continuity.
- Technical process documentation and user manuals.

Technologies: Google Apps Script, JavaScript, Google Workspace

Systems Engineer (Development and Support)

Acción del Cauca S.A.S. — client La Ofrenda S.A. | April 2022 – April 2023

- Requirements gathering with business areas and translation into technical specifications.
- Development of applications in ASP.NET and WinForms with Oracle database.
- Optimization of SQL queries and operational and commercial reports.
- Resolution of incidents assigned in Trello, with recording and follow-up of progress.

Technologies: C#, ASP.NET, WinForms, Oracle, SQL, Trello

Development Engineer

Súper Redes S.A.S. | June 2019 – April 2022

- Analysis, design and development of modules for the ISP-365 information system, in development and production environments.
- Development of the SIO system in C#, SQL Server and ASP.NET WebForms, deployed on Azure App Service.
- Monthly management of batch electronic invoicing and validation against the DIAN (Colombian tax authority), updating the PostgreSQL database.
- Handling and resolution of ISP-365 system incidents, working with version control in Git, GitHub and Bitbucket.

Technologies: C#, ASP.NET WebForms, Angular, PostgreSQL, SQL Server, Phalcon ORM, PHP, AWS Cloud9, Azure, Git, Bitbucket

Junior Programmer

PETI Soluciones Productivas | June 2018 – December 2018

- Development of modules in ASP.NET WebForms and Visual Basic .NET with MySQL database.
- Development of user interfaces with HTML, CSS and JavaScript.
- Participation in requirements analysis, unit testing and functional validation.

Technologies: ASP.NET, WebForms, Visual Basic .NET, MySQL, HTML, CSS, JavaScript

Systems Technician

Indra Colombia Ltda. | March 2016 – October 2016

- Technical lead during the warranty phase, analyzing and resolving software incidents reported in projects delivered to Old Mutual, FOSYGA and Gas Natural.
- Implementation based on design documents, following organizational standards.
- Development of web and desktop applications in ASP.NET WebForms, MVC and WinForms, integrated with SQL Server and Oracle.

- Static code analysis with SonarQube.
Technologies: ASP.NET WebForms, MVC, WinForms, C#, SQL Server, Oracle, Angular, SonarQube, Jira

Engineering Assistant

Casa de Software Prosof S.A.S. | February 2015 – February 2016

- Preparation of use case specifications and communication interface requirements documentation.
 - Active participation in design meetings and preparation of architecture and detailed design documents.
 - Coding following organizational standards and source code inspection.
 - Preparation of technical and operational manuals together with quality control, and internal and external training.
- Technologies: Java, technical documentation, QA, CMMI DEV 3

ADDITIONAL EXPERIENCE

- **Auditor and Programmer** — Fastec de Colombia S.A.S. | Nov. 2006 – May 2007. Development of a web application for online cash flow control with PHP and PostgreSQL; auditing of inventories and cash flows, including physical count observation and selective recount testing.
- **Programmer Engineer** — CSA S.A.S. (formerly Softelco) | Jan. 2005 – Jan. 2007. Web and desktop applications in Visual Basic .NET, ASP.NET and Java, with MySQL and SQL Server; functional documentation and test plans.
- **Administrative career in the healthcare sector** — Audifarma S.A. | 1998–2003 and 2007–2014 (11 years). Pharmaceutical care center coordination, billing, account review and claims management: provides functional understanding of the business in healthcare and billing projects.

FEATURED PROJECTS

- **Sales and Invoicing Management System** — ASP.NET Core (.NET 10), Angular, SQL Server, Docker (multi-stage Alpine, Compose, Nginx as proxy), Azure Pipelines. Full stack solution with layered architecture, JWT with refresh tokens, BCrypt hashing, rate limiting, security headers and integration tests with xUnit. CI pipeline running build, tests and image publishing to Docker Hub. Repositories: APISistemaVenta and APPSISTEMAVENTA.
- **Data Cleaning ETL Pipeline** — Python, Pandas, FastAPI, AWS, GitHub Actions. Automation of ingestion, validation and cleaning of CSV files. Repository: limpieza-datos-python-pandas.
- **Mobile music player application** — React Native. Practice project focused on cross-platform mobile development. Repository: ReactNativeSpotifyminiclone.
- **GitHub:** github.com/jotalexvalencia • APISistemaVenta (.NET REST API) • APPSISTEMAVENTA (Angular front end) • limpieza-datos-python-pandas (ETL) • ReactNativeSpotifyminiclone (mobile)

EDUCATION

- **Specialist in Software Development** — Universidad Católica de Pereira, Colombia | 2017
- **Systems Engineer** — Universidad Nacional Abierta y a Distancia (UNAD), Colombia | 2013
- **Technical Degree in Pharmaceutical Services Assistance** — INEC, Pereira (1,700 hours) | 2010

CERTIFICATIONS

- **Internal Quality Audit** — NTC ISO 9001 | SENA, 40 hours | 2023
- **EF SET English Certificate** — CEFR B2 Upper Intermediate (56/100) | 2025
- **Scrum Foundation Professional Certificate (SFPC)** — CertiProf | 2020
- **Requirements Engineering** — SENA - Fedesoft | 2015
- **ITIL Foundations (preparation course, 34 hours)** — PETI Soluciones Productivas | 2018

ADDITIONAL TRAINING

- **AI Development: from Zero to Production** — BIG School | 2026
- **Python for Automation and APIs** — Ardit Sulce, Udemy | 2026
- **Applied Generative AI** — Microsoft Learn | 2026 • **AI and Digital Tools** — Google Skills | 2026
- **Modern JavaScript** (20.5 h) — Udemy | 2025 • **React Native and Mobile Development** — JavaScript Mastery | 2026
- **Excel University: Basic, Intermediate and Advanced** (13.5 h) — Udemy | 2024 • **Git and GitHub** (12 h) — Udemy | 2024
- **Software Testing from Scratch: MasterClass** (9 h) — Udemy | 2023

LANGUAGES

Spanish: Native. **English:** B2 Upper Intermediate — EF SET 56/100 (March 2025): Reading C1, Writing C2, Speaking B1, Listening A1. Strong in reading and writing; actively improving listening and speaking.

AVAILABILITY AND REFERENCES

Availability: Immediate. **Work mode:** On-site, hybrid or remote (based in Pereira / Dosquebradas, Risaralda, Colombia). **Salary expectations:** negotiable based on responsibilities and benefits package.

Professional and personal references: available upon request. Employment certificates, diplomas and verifiable credentials are provided during the selection process.
